1. Do an analysis on existing solution for **XR** applications in Malaysia and/or globally from the aspects of the services and functionalities provided by the solution. Then, propose **FIVE**
(5) possible mobile/web solution/features/functions for **XR** applications in Malaysia and/or globally. (10 marks)

For an analysis of an existing solution of XR applications, this report will choose entertainment and gaming as a case study.

1. Evolution of developing XR games and media

XR in gaming has evolved to a point where developing XR applications can be done by independent developers. Game engines such as Unity and Unreal Engine allow developers to create XR games and entertainment for free with their services, along with the necessary technologies and plugins to be compatible with multiple XR devices, such as the Oculus Rift, Valve Index kit and many more.

2. Detailed Rendering virtual environments

Rendering virtual environments with XR games has also improved significantly. With games such as Half-Life Alyx that can render life-like animations and more detailed graphics with the current gen system. This innovation in XR rendering technology may also be incorporated into more practical and business ventures, allowing for a more detailed simulation of prototypes and environments to be used.

3. Improvements to economy

XR entertainment has provided a revenue boost to the gaming industry by introducing a new medium and genre of media and games to produce and consume. With more games and more choices in hardware to interact and play, the economy projected from XR entertainment is speculated to grow from 180 billion USD in 2024 to 253 billion USD in 2025(source: https://www.fortunebusinessinsights.com/extended-reality-market-106637), providing more business ventures and job opportunities towards XR software development.

4. Innovation towards interactivity

Entertainment and Gaming in XR allows the facilitation to experiment with more intuitive controls to interact with virtual objects and can be a medium for the XR
